

DINO'S DYNAMOS

Craft

Pasta Necklaces!

You will need:

- Pasta (with holes in the middle, for example penne pasta or macaroni)
- Elastic String
- Paint and brush
- Newspaper
- Glitter

Step 1. Measure the length of elastic string you need for your necklace. You can choose to make a long or short one.

Step 2. Thread on the pasta until the string is full. This allows you to use just the right amount of pasta you will need.

Step 3. Lay the pasta on a newspaper and paint one side of each bit. Let the paint dry for an hour.

Step 4. Turn the pasta over and paint the other side.

Pasta Necklaces!

Step 5. Now is the time to sprinkle glitter over the wet paint if you would like a sparkly necklace. As the paint dries, the glitter will stick to it.

Step 6. Once the pasta is dry thread it back onto the elastic string and tie a knot to complete your necklace.

Why not try to make a bracelet or a head band!?

FACT! There are hundreds of different types of pasta that come in all shapes and sizes, from tubes to bows and spirals!

FACT! Pasta even comes in different colours! You can get red, green and black pasta as well as the normal yellow pasta.
