

DINO'S DYNAMOS Recipe

Stripy Ice Core Ice Lollies

You will need

A selection of fruit juices
Ice lolly moulds or plastic cups
Lolly sticks

Instructions

Step 1 Pour a small amount of fruit juice into the moulds or plastic cups, place them in the freezer.

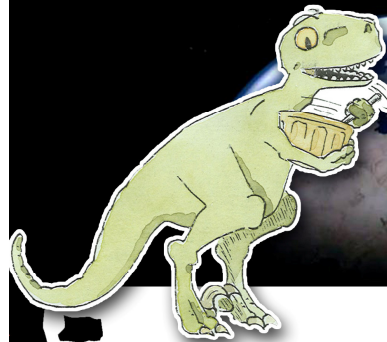

Step 2 Once the lollies are solid take them out of the freezer, push in a lolly stick and pour in a small amount of a different fruit juice, return them to the freezer.

Step 3 Repeat the process, adding more layers until the moulds are full.

Step 4 Once your lollies are completely frozen take them out of their moulds and enjoy!

Dino says "Cool!!"

DINO'S DYNAMOS Recipe

Ice sheets are made of layers of snow, one layer represents one year's snowfall.

Scientists can drill down into ice sheets to collect ice cores which can be analysed to tell us about the Earth's climate and atmosphere thousands of years ago.

FACT! The longest ice core ever drilled was 3053.44m!
