

DINO'S DYNAMOS

Puzzle

Sudoku Challenge

This month Dino needs you to use your number skills to help him solve mathematical problems! Having only three fingers on each arm, Dino has never been very good at counting. Can you help him out?

Good luck Dynamos!

Lets get puzzled?!

Sudoku is a number puzzle which first became popular in Japan in 1986.

The rules of Sudoku are simple:

You can only use the numbers 1 to 6.

- Each horizontal **row** should contain each number only once.
- Each vertical **column** should contain each number once.
- Each of the six **bold boxes** should contain each number once.

		1	5		
	5		4	6	
5	3	4	6		2
1		6	3	5	4
	1	3		4	
		5	1
